**Makes Administrator Life Easy**

COSMO is a Mobile Friendly Server Monitoring Tool Exclusively for the IBM Cognos. It is Smart, Intuitive, Easy-to-Use and Ally of an Administrator.

IBM Cognos is one of the leaders in Business Intelligence & Business Performance Management. It enables management/business users to access data, analyze and make informed decisions to keep company moving forward on the path of excellence. IBM Cognos is also one of the core tenet in business operations and empowering people in the organization. It is highly critical to upkeep and ensuring availability of the Cognos Services running on cluster of servers. Administrator of these servers is an unsung hero who works tirelessly and is on alert mode around the clock to ensure uptime to minimize disruptions in the business operations.

COSMO service monitoring app with actionable tools designed to make lives of unsung heroes (Administrators) easier. Using COSMO, the Administrator will be able to stop and restart the service using the mobile app securely from anywhere, anytime and more.

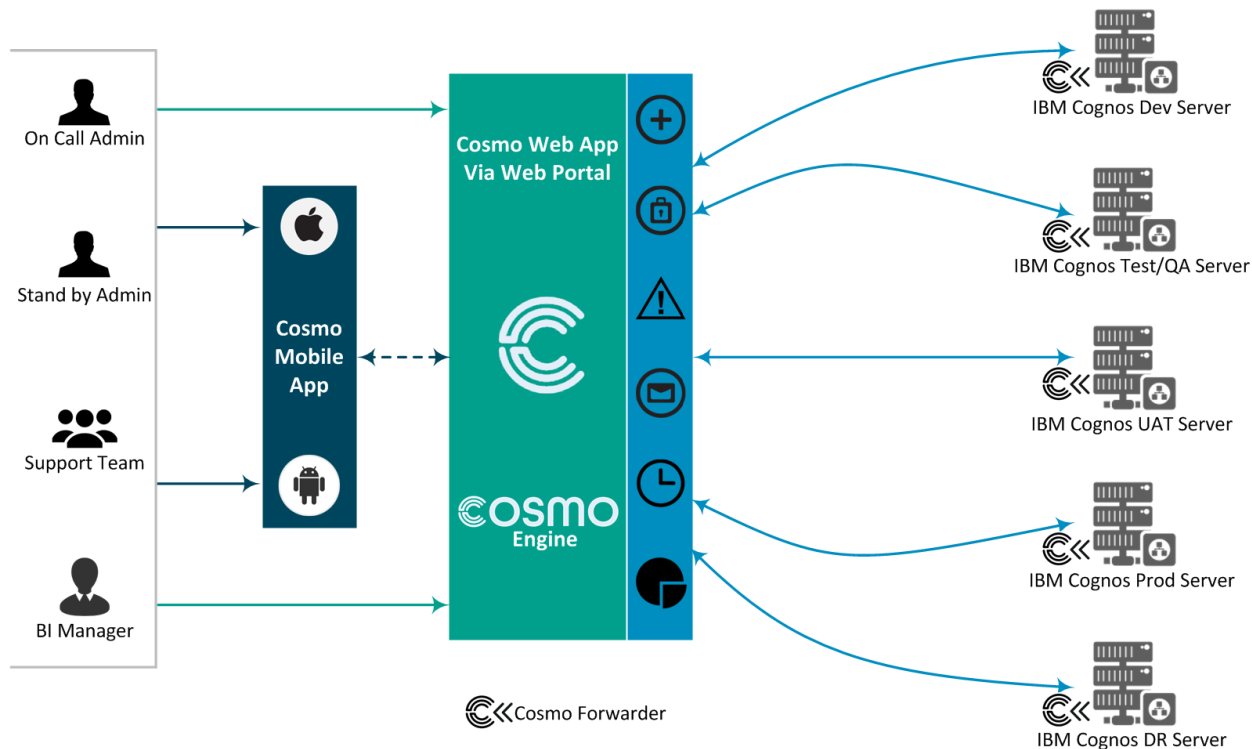

### **BENEFITS:**

- **Uptick in Efficiency:** Access to smart tools to assess issues/incidents and resolve minimizes server downtime, saves time and boosts analytics availability.
- **High ROI:** Small investment in COSMO improves smarter usage of resources and increase in productivity.
- **Strong Loyalty:** Recognition of unsung heroes (Administrators) and an effort to make their lives easier increases loyalty for the organization.

## HOW COSMO WORKS:

- Monitor IBM Cognos Services; Receive notifications when services are down.
- Access Incidents, Resolve and Track outage.
- On-Demand or Schedule to Stop, Start or Restart IBM Cognos Services from one place.

## PRICE:

The COSMO app is offered for a one time fixed fee plus annual support fee. You can request a **FREE 30 day trial** at [hellocosmo@teamclutch.com](mailto:hellocosmo@teamclutch.com)
